

Name: Colin Weightman

Occupation: Apprentice Property Maintenance Operative

My name is Colin. I studied at On Track Education in Westbury from 2017 to 2022.

My first couple of months at On Track were spent getting to know two members of the teaching team via Outreach. At first my behaviour was all over the place and I struggled to regulate my emotions but after lots of hard work between me and Jo I started to settle down

After my first year I found I had taken a big interest in design Technology (wood work) and I worked closely with the DT teacher to build my wood working skills; one of my biggest projects as a student was building a decking around the back of the school building.

By the end of my time as a student at On Track I had made so much progress I was given the opportunity to train in property maintenance as an apprentice.

I have now been working at On Track Education for a year and a half: I have attended college and vastly improved my skill set and mind set.

Massive thank you to Jo for pushing me to be the person I am today.
